

Alaska 200 Club

27th Report

2008

The Alaska 200 Club emblem portrays a Steller's Jay, *Cyanocitta stelleri stelleri* [Gmelin, 1778 {Vancouver Island, British Columbia}], new to ornithology in July 1741 when discovered at Kayak Island (Southcoastal Alaska) by George Wilhelm Steller. This find convinced Steller that the expedition had indeed reached the New World, and in a manner, establishing the Steller's Jay as the first bird to the Alaska list. In the background is the vessel *Saint Peter* which carried Bering, Steller, and contingent to Alaska.

TWENTY-SEVENTH REPORT OF THE ALASKA 200 CLUB

The Alaska 200 Club, formed in 1979, is a membership of people that have recorded 200 or more species of birds, wild, alive and unrestrained in Alaska { *Charter members = Roster #'s 1 – 12*}. This report summarizes 200 Club data through the end of 2007, and includes all 2007 updates that were sent to us by January 6, 2008.

The club roster stood at 247 members at the end of 2006. Eight new members joined the club in 2007: Bob Dittrick (#248), Rob MacDonald (#249), Georgia Conti (#250), Beth Peluso (#251), Aaron Lang (#252), Karen Pfeifer (#253), Susan Westervelt (#254), and Jennifer Johnson (#255). David Sonneborn remains at the top of the list; still the only birder to see more than 400 birds in Alaska. Members who submitted data in 2007 indicating that they had reached the 300 species plateau included James Levison David Narins and Stan Wulkowicz. Thirty-three members of the club have now reached that level.

Table 1 summarizes the membership ranking at the end of 2007, based on species total, and includes the year of each member's most recent update. Sixty-seven members provided new or updated information for the 2007 report.

The 200 Club follows the CHECKLIST OF ALASKA BIRDS, including the "Unsubstantiated List" (but excluding species introduced or of questioned origin), maintained by the University of Alaska Museum. Changes made to the Checklist in 2007 include the following 6 species added to the main list: Taiga Bean-Goose (as a result of division by the AOU of the bean geese into two species--Taiga and Tundra--both of which are now on the Alaska list); Brown Hawk Owl (St. Paul Island 27 August, 2007); Sedge Warbler (Gambell, 30 September, 2007); Vesper Sparrow (Hyder, 4 June, 2007); Yellow-browed Bunting (Gambell, 15 September, 2007); and Bullock's Oriole (Gambell, 13 September, 2007; removed from the unsubstantiated list). With these additions the list stands at 484 species (plus an additional 26 species on the Unsubstantiated List). The Checklist can be found by using the link to the UAF Museum website on the Alaska 200 Club website. The URL for the Alaska 200 Club website is: http://home.gci.net/~juneaubird/club_index

All communications regarding the 200 Club should be sent to Steve Zimmerman either by e-mail (stevezimmerman@gci.net) or to: P.O. Box 20058, Juneau, Alaska 99802. This list is only updated once per year. Please send updates for the next list in December, 2008 or no later than January 10, 2009.

TABLE 1.
ALASKA 200 CLUB MEMBERSHIP STATUS THROUGH 2007

Member	Member Roster	Residence	Total List	Year
